**52** COUNTRIES coverage

# Our Clients

# Mystery Employee Advantages

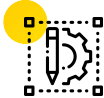

## Insider View

An employee that reports on their treatment, training, and experience from the beginning can give you a lot of insight into the employee experience.

## Voice to the Employee

These types of Mystery Employees can report on what other employees experience as well. They can be the eyes and ears of their coworkers, and while names shouldn't be given (since this could hurt workplace relationships), they can at least have a voice that is a direct line to an important executive.

## Management Accountability

It's often said that if someone says their manager is not a good manager, it must be true, because the ability to manage is dependent on employees feeling that their contributions are valued and their manager appreciates their work.
